Paper 1			
TIME: 2HRS			

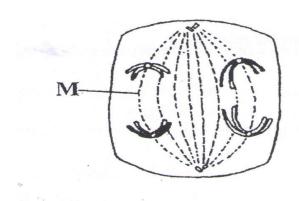

### **Kenya Certificate of Secondary Education**

231/1 BIOLOGY PAPER 1 TIME: 2HRS

### **INSTRUCTIONS**:

- (a) Write your name, class, admission number and index number on the space provided.
- (b) Answer all the questions in the spaces provided
- (c) Candidates should check to ensure that all the pages are printed as indicated and that no questions are missing.
- (d) This paper consists of 10 pages.

1. Name the part of a flower that develops into:	
[i] Seed	[1 mark]
[ii] Fruit	[1 mark]
2. State <b>two</b> ways in which floating leaves of aquatic plants are adapted to gaseous exch	[2 marks]
3. The diagram below represents a stage during cell division	

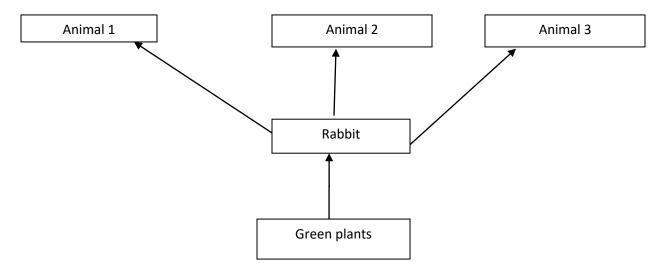

[a] [i] Identify the stage of cell division

24 ©Sabin E-Library

[ii] Give <b>two</b> reasons for your answer in [a] [i] above	[2 marks]
[b] Name the structure labeled M	[1 mark]
4. [a] Distinguish between the terms  Homodont and heterodont	[2 marks]
[b] What is the function of the carnassial teeth	[2 marks]
5. A patient with blood group A was involved in a road accident and required transfusion. His relatives were invited to donate blood.	urgent blood
[a] Name the compatible blood groups	[2 marks]
[b] State why other blood groups were not compatible	[2 marks]

6. The flow chart shows a part of a food relationship in an ecosystem

[a] [i] Name the food relationship shown	[1 mark]
[ii] How many trophic levels are shown in the diagram	[1 mark]
[b] What is the main source of energy in the ecosystem	[1 mark]
7. Name the only epidermal cell in plants that contain chloroplast	[1 mark]
3. The equation below represents a metabolic process that occurs in the mammalian l	
Amino Acids → organic compound Enzyme x	
[a] Name the process that represents the above equation	[1 mark]
[b] Identify the enzyme represented by x	[1 mark]

[c] What is the importance of the process to the mammal	[1 mark]
9. [a] Name the carbohydrate that is stored in mammalian muscle	[1 mark]
[b] What name is used to describe removal of indigestible and undigested for alimentary canal	ood material from the [1 mark]
10. [a] Carl Linnaeus developed the taxonomic units of classification	
[i] What is taxonomy	[1mark]
[ii] Why was the system of classification by Carl Linnaeus described classification	as natural system of [2 marks]
11. Phagocytes also called granulocytes or polymorphs are cells found in the pathogens and cell debris	
[i] Why are they called polymorphs.	[1 mark]
[ii] Name the cell organelle most abundant in phagocytes that enable them	
12 Name the:	

[a] Material that strengthens xylem tissue	[1 mark]
[b] Tissue that is removed when the part of a plant is ringed	[1 mark]
12 m 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1	• • • • • • • • • • • • • • • • • • • •
13. The diagram below represents a cell organelle.	
from, En a	
	*
vezicies	
Golg! complex A	
B	C,
om the en	
[i] State the function of this organelle	[1 mark]
[ii] Name each of the parts A and B	
A	[1 mark]
В	[1 mark]
14. In which two ways do guard cells differ from other epidermal cells	[2 marks]
15. [a] Through cellular respiration, the chemical energy stored in glucose me	
into which specific molecule	[3 marks]
	•••••
[b] Name the substance that speed up biochemical reaction	[1 mark]

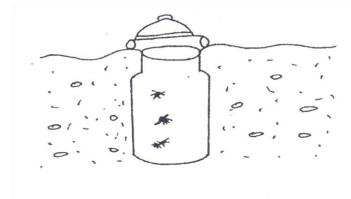

©Sabin E-Library

2024

16. During germination and early growth, the dry embryo increase explain.	_	of arks]
		• • • • • •
17. The diagrams below show changes in the life cy	cle of flowering plants.	
The diagrams below show enames in the life of	ele of nowering plants.	
	A STATE OF THE STA	
	)	
	La constant	
A .		
\ 0 0 /	D. C	
	F	
В	G	
[i] Complete the table below by choosing the le	etters from the diagram which refers to as	ch of
the stages given.		arks]
the stages given.	[+ 111	arksj
STAGE OF LIFE CYCLE	LETTER	
Male gametophyte		
Tube nucleus		
Female gamete		
Male gamete		
IX State two characteristics of kingdom Monera the		1 7
10. State two characteristics of kingdom Monera the	at are not found in other kingdoms. [2 i	narks
10. State two characteristics of kingdom Monera the	at are not found in other kingdoms. [2 1	narks]
16. State two characteristics of kingdom Moneta the	at are not found in other kingdoms. [2 i	narks]
16. State two characteristics of knigdom Monera the	at are not found in other kingdoms. [2 1	narks
16. State two characteristics of knigdom Moneta the	at are not found in other kingdoms. [2 i	narks] 
19. State <b>three</b> ways by which plants compensate		
	for lack of the ability to move from one	  place
19.State <b>three</b> ways by which plants compensate		  place
19.State <b>three</b> ways by which plants compensate	for lack of the ability to move from one	  place
19.State <b>three</b> ways by which plants compensate	for lack of the ability to move from one	  place
19.State <b>three</b> ways by which plants compensate	for lack of the ability to move from one	  place

	•••••
20. State <b>three</b> physiological processes that are involved in movements of substances	across the cell
membrane.	[3 marks]
	• • • • • • • • • • • • • • • • • • • •
21. If the human pancrease is not functional:	
[a] Name the hormone which will be deficient.	[1 mark]
	•••••
[b] Name the disease the human is likely to suffer from.	[1 mark]
22. The oxidation state of a certain food is represented below by a chemical equation.	•••••
$2C_3 H_2O_2N + 6O_2 \longrightarrow (NH_4)_2 CO_2 + 5CO_2 + 5H_2 O$	
[a] Calculate the respiratory quotients [RQ] of the food substance.	[2 marks]
[b] Identify the food substrate	[1 mark]
[0] Identify the root substitute	

23. The diagram below shows an apparatus used during collection of specimen.

	[a] Identify the apparatus	[1 mark]
	[b] What is the use of the apparatus named above	[1 mark]
24.	State <b>two</b> physical factors in an ecosystem that affect the distribution of organisms.	[2 marks]
25.	A DNA strand has the following base sequence G C C T A G A T C A C.	
	What is the sequence of the  [i] Complementary DNA strand	[1 mark]
	[ii] M-RNA strand copied from this DNA strand.	
26.	State <b>three</b> limitations of fossil records as evidence of organic evolution	
		• • • • • • • • • • • • • • • • • • • •

27. Ex	plain tl	he term "Resistance" as used in evol	ution of living organisms	[2 marks
•••	• • • • • • • •			••••••
 28 Sto	to the	function of the following parts of	a light microscopa	•••••••
	ie ine	function of the following parts of	a fight finctoscope.	[1 mark]

#### FORM 4 ENTRANCE EXAMS 2024

## **BIOLOGY 231/1 MARKING SCHEME**

- 1.[a]Ovule
  - [b]Ovary
- 2. Aerenchyma tissue with large air spaces to store air.

Large stomata found on the upper surface of the leaf

- 3.[a] (i)Anaphase1
  - (ii) -Homologous chromosomes separate towards the poles
- b -Spindle fibres contract separating the homologous chromosomes
  - b) Spidle fibre
- 4.[a] –Homodont –teeth of the same size and shape
  - Heterodont –teeth of different size and shape

[b]Special pre-molars with smooth sides and sharp edges to slice through flesh and crush bones

- 5 [a] -B
  - -AB'
  - [b] O –Universal donor since they have no antigens
    - A Same blood group hence no agglutination
- 6.[a]-[i] Food web

- -[ii] Three
- [b] Sun
- 7. Guard cells
- 8.[a] Deamination
  - [b] Enzyme orginaze
  - [c] Removal of the excess amino acids
- 9.[a] Glycogen
  - [b]Egestion
- 10.[a]-[i]Science of classification
  - -[ii]Uses evolutionary relationship between organism and their ancestor
- 11.[a]-[i]They have lobed nuclei
  - -[ii] Lysosomes
- 12.[a]Lignin
  - [b]Phloem
- 13. [i] -Packing and transport in venicles of material such as enzyme
  - Secretion of synthesized proteins, carbohydrates
  - Process of cisternae
  - Involved in lysosome formation
  - [ii] A. Golgi Apparatus
    - B. Golgi vesicles/ bodies
- 14 Guard cells have chloroplast hence photosynthesis, epidermal cells are transparent
- -Have thicker inner walls and thin outer walls for differential expansion to facilitate opening and closing of the stomata.
  - -Are bean shaped
  - -Epidermal cells have uniformly thickened walls
  - -Epidermal cells are rectangular flattened cells
- 15.[a]ATP-Adenosine triphosphate
  - CO<sub>2</sub>-Carbon [IV] oxide
  - H<sub>2</sub>O-Water

- [b] Enzymes
- 16. Food stored in the endosperm was oxidized to form energy for the process and also form new material for growth in the embryo.
- 17. Embryo grows and develops forming new issues that result in increase in weight

STAGE OF LIFE CYCLE	LETTER
Male gametophyte	D
Tube nucleus	G
Female gamete	В
Male gamete	F

- 18. -Their nuclear material is not enclosed within a nuclear membrane so the genetic material is not separated from the rest of the cell/Prokaryotic
  - They do not have membrane bound organelles
- 19.-Plants are able to synthesize their own food.
  - -Plants are able to use pollination rather than moving to seek mating partners.
  - -Plants use seed and fruits dispersed to colonize new habitats.
- 20.-Diffusion
  - -Osmosis
  - -Active transport
- 21.[a]Insulin, glucagon

[b]Diabetes mellitus, Hypoglycaemia

22.[a] RQ = volume of carbon[IV] oxide produced

Volume of oxygen consumed

5/6 = 0.83

[b] Proteins

23.[a]Pitfall trap

[b] For catching crawling animals

- 24.-Temperature; Humidity
  - -Light; Atmospheric pressure
- 25.[i] CGGATCTAGTG

[ii]CGGTUCUTGUG

- 26.-Several missing links
  - -Most organisms especially soft-bodied ones do not form fossils
  - -Exposed fossils are usually destroyed by physical and chemical weathering
  - -Most animals are preyed upon.
- 27. Some individuals in a population possess genes that have undergone mutations resulting in resistance against some chemicals. The mutations establish a population of resistant forms
- 28. [i]Holds the eyepiece and the revolving nosepiece
- [ii]An aperture that regulates the amount of light passing through the condenser to illuminate the specimen.
- 29.-Substitution
  - -Inversion
  - -insertion
- 30.-Mutation
  - -Crossing over during prophase of meiosis
  - -Sexual reproduction [fertilization]
  - -Independent assortment of chromosomes during metaphase of meiosis 1
- 31. (a) Malaria
  - (b) Amoebic dysentry
